Caron Business Solutions Receives the go ahead from Microsoft to join the Empower Program

Caron Business Solutions will develop a utility to help consultants easily analyze and troubleshoot Sage Accpac ERP logs using Microsoft technology.

Vancouver, British Columbia, (April 1, 2004) – Caron Business Solutions Inc., a Burnaby based development firm, is pleased to announce that they have been accepted into the Microsoft Empower Program for development partners.

This program is designed to help independent software vendors (ISV's) succeed both in developing products and in growing their business. The Microsoft Empower Program for ISV's promotes success by providing key resources for the development and marketing of software products on Microsoft platforms.

“Caron Business Solution is pleased to be recognized for our highly skilled staff and we are excited to move forward with this project. Partners like Microsoft and their Empower Program make it possible for innovators to push their excellence even further,” said Fan Chun, Director of Services.

The new product being developed will be called RVSpyViewer and will help consultants to analyze Sage Accpac ERP logs produced by the RVSpy utility. These logs are produced in huge text files. RVSpyViewer will find, consolidate data and pinpoint errors quickly; helping consultants to be more accurate and speed up the time it takes in analysis. The utility will further organize information to be accessed and managed easily.

About Microsoft

Founded in 1975, Microsoft is the worldwide leader in software, services and internet technologies for personal and business computing.
