"Gold Miner implements a Complete Mining ERP Solution!"

Company

Talisker Resources Ltd.

Industry

Mining – Gold

Number of Employees

25 - 50 employees

Mining Phase

Production

AT A GLANCE

Talisker (taliskerresources.com) is a junior resource company involved in the exploration and development of gold projects in British Columbia, Canada. Talisker's flagship asset is the high-grade, fully permitted Bralorne Gold Project where the Company is producing at the Mustang Mine. Talisker projects also include the Ladner Gold Project, an advanced stage project with significant exploration potential from an historical high-grade producing gold mine and the Spences Bridge Project where the Company has a significant landholding in the emerging Spences Bridge Gold Belt, and several other early-stage Greenfields projects.

CHALLENGES

During the Exploration and early Development Phases, Talisker was using accounting software that was developed in the 1980's. Company leadership knew that they needed a modern ERP that would provide essential management information and KPI's, had excellent workflows and audit controls and a solution that would grow with them. They also required an ERP partner who understood mining.

SOLUTION

Talisker turned to Caron Business Solutions for help because of Caron's extensive mining expertise. Caron Mining Solutions, Powered by Acumatica provided the components that would support Talisker into production and beyond. Caron Mining Solutions powered by Acumatica provided a solid base to support Talisker's move to First Gold in September 2025.

Acumatica
